Simon i7 Series

Elegant Simple
Unique Sophisticate

Simple and elegant as a piano
Its extensive face with vertical and proportionate lines gives a confortable and desirable form. Adopting the latest technology, the switch and the socket have the same size. The visual effect is more astheticaly pleasent.

i7 series of switches and sockets have multi-gang frames (up to 5 gangs) with multiple combinations.

A special SIMON mounting box is needed (60710-50) in order to emphasize the visual expression of the design.

Multi-gang design

Safe and soft push

The feeling, when pushing, is confortable and easy as i7 adopts the J Shape Toggle system.
Due to the J shape toggle system, the angular movement is very precise (only 4.5 degrees) making the pushing feeling faster and safer.

Flexible wire, easy to connect

The saddle shape of the terminal has a wider wire.
The shade of the terminal avoid the wire to be damaged. As the wire is wider than the average ($0.55m㎡ \leq f \leq 6m㎡$), the house electricity system is easier to connect.
Simple
and sophisticate

The base and the frame are
integrated with the same design.

Ultra extraordinary

The base, made of PC-steel material, has high
strength and no deformation.

Children safety block

Extremely Simple

1) At home, the children often play and crawl on the ground putting their life in different kind of risks.

2) Droven by curiosity, children always explore new things.

3) The outlets can be easily reached, therefore there's a potential threat to their life, if there is no safety lock in the sockets.

4) SIMON's sockets have the children safety lock that protects in two ways. In one side, when inserting something in one socket hole, the device will not work. In the other side, when external things are inserted the socket will also avoid connection, protecting the children and the families.

Extraordinary

The new electronic technique
enable energy saving

i7 adopts a new electronic technique, to achieve two-wire system of full load (which can be suitable for incandesent, fluorescent, halogen and LED with only two wires), that enables saving energy and reducing the use of carbon.
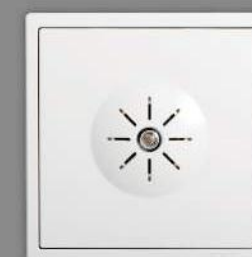

Touch time delay   Presence detector   Voice and light
