Elektrim TECHTOP

INTRODUCTION

Elektrim Techtop, a collaboration between two specialized veterans in the electric motor industry, serves to provide you only the highest quality electric motors, now on a global scale. Our partnership will enforce our vision for the industry and for our customers, ***Driving Our Globalized Brand with Localized Service***. Customer assurance and satisfaction serves as our top priority for you. To ensure this, we deliver the best after-sales policy in the industry, as well as having a professional technical personnel and experienced sales team. With our recent game-changing partnership, you are able to receive personalized service or get our products easily exchanged in all the 20-over countries we operate in. This gives you easy accessibility to all our services almost anywhere on the globe.

Previously known as Elektrim Motors & Machinery Pte Ltd, our company was founded in 1981 and has grown to be a leading powerhouse in the motor industry over the last 30 years. We have grown to have a strong regional network in over 10 Asian countries. Our main office which is located in Singapore, sits on an area of 90,000 square feet. It carries an inventory level of more than S\$3 million worth of stocks to meet our customers' demands. With the inception of our Malaysia and Vietnam branch offices, coupled with our partnerships with loyal agents and distributors all across Asia, our customers' needs are always well attended to.

Our brand is the No. 1 specialized brand in providing electric motors to the Palm Oil and Quarry Mining industries. Our brand is well recognized and trusted in the industries of Rubber, Industrial Fan, Marine & Offshore Engineering, Agricultural, Buildings, Cement and especially among the OEM production. Our motto is to be ***The Driving Force behind Every Machine***. To achieve this, all our motors are enhanced in our factory and regulated to stringent Quality Checks before delivery to ensure that our customer satisfaction and needs are always met. We believe in crafting each individual Elektrim Motor with precision and care to ensure the highest quality motors for our customers.

EU Efficiency Level Classification

General

With the aim to reduce the power requirement of electric motors and to the energy consumption in Europe, CEMEP and the European Union reached an agreement, by which 2- and 4-pole three phase AC motors are affected, i.e. standard motors, defined as totally enclosed fan cooled, squirrel cage low voltage motors with 400V, 50Hz and S1 in the rated output range of 1.1 to 90kW.

In the 1.1 to 90kW output range, the 2- and 4-pole standard three phase motors described in this documentation correspond with the EU efficiency classification EFF2. Designation takes place with the EFF2 logo on the nameplate.

2 Pole	IE1	IE2	IE3	IE4

Degrees of protection

General

Designation	First Numeral	Second Numeral
	Protection against contact and ingress of foreign bodies. Protection against hazardous "Live" parts and moving mechanical parts.	Protection against water
	5. Ingress of dust is not totally prevented, but dust shall not interfere with the satisfactory operation of equipment. A probe of 1mm diameter shall not penetrate the enclosure.	5. Water projected in jets against the enclosure from any direction will have no harmful effects.
	6. No ingress of dust	6. Water projected in power jets shall have no harmful effects.
IP55	Dust protected	Jetting water
IP56	Dust protected	Powerful Jetting
IP65	Dust tight	Jetting water
IP66	Dust tight	Powerful Jetting

Induction Motors

Three-Phase Asynchronous Motors Cast Iron / Aluminum Housing

EMM series of three phase asynchronous motors are constructed Totally Enclosed Fan Cooled (TEFC), and is available in both cast iron and aluminium housing. It encompasses our latest design with many new features, are made of selected high quality materials and conform to the IEC Standard.

Some unique design features are our special conical pro ventilation fan cover, detachable feet for cast iron housing, and extended aluminium housing range up till frame size 200. EMM series motors comes with Protection IP55, Insulation Class F and NSK imported bearings as a standard issue. These series of motors can be used for general drives.

Class H Motors

Three-Phase Asynchronous Motors
Cast Iron / Aluminum Housing

Class H series of three phase asynchronous motors are constructed Totally Enclosed Fan Cooled (TEFC), and is available in both cast iron and aluminium housing. Class H series of motors is a enhancement of our standard induction motors, technical data will be as follows with induction motors.

Class H motors are to cater to the needs of High Temperature Resistance requirements. It can withstand an ambient temperature of up to 85 °C, and an internal winding temperature of up to 300 °C for up to 2 hours, this is achieved through higher temperature safety margins and enhancements onto our internal winding, and many more.

TENV Motors

Three-Phase Asynchronous Motors
Cast Iron / Aluminum Housing

TENV series of three phase asynchronous motors are constructed Totally Enclosed Fan Cooled (TEFC), and is available in both cast iron and aluminium housing. TENV series of motors is a modification of our standard induction motors, technical data will be as follows with induction motors. TENV motors come without fan blade and fan cover, and with a 1 metre wire extension with detached T-box as standard issue. These series of motors can be used for fan duty.

Inverter Motors

Three-Phase Asynchronous Motors
Cast Iron / Aluminum Housing

Inverter series of three phase asynchronous motors are constructed Totally Enclosed Fan Cooled (TEFC), and is available in both cast iron and aluminium housing. Inverter series of motors is a enhancement of our standard induction motors, technical data will be as follows with induction motors.

Inverter duty motors are fully compatible with any brand of VFD/VSD, the motors are capable of prolong operation at frequencies between 5Hz to 100Hz. Inverter duty motors comes standard with an attached Force Cooling Fan, longer rotor and stator construct, and reinforced corona resistance.

Brake Motors

Three-Phase Asynchronous Motors Cast Iron / Aluminum Housing

Brake motors series results from coupling an asynchronous three phase motor to an electromagnetic D.C. brake unit. Due to their reliability and operating safety, as well as their quick braking time (connection & disconnection time = 5 to 80 milliseconds), these series of motors are suitable for a great variety of applications, such as:

- Braking of loads or torques on the drive shaft
- Braking of rotating masses to reduce any lost time
- Braking operations to increase the set up precision
- Braking of machine parts, according to safety rules

Slip Ring Motors

Three-Phase Asynchronous Motors Cast Iron Housing

Slip ring series of three phase asynchronous motors is a selection of high torque motors that caters to client specific applications. These series of motors are only available in cast iron housing due to the heavy duty nature of use, well designed exterior, and conforms to all IEC standards.

Slip ring motors comes attached with our in-house designed Slip Ring Device with carbon brush, made from high quality materials, according to European motor winding standards and technology. This series of motors can be used for all heavy duty industries.

Basic Performance Datas (380/415V, Deltar Connection)

Single-Phase Motors

Three-Phase Asynchronous Motors Cast Iron / Aluminum Housing

Single phase series of aluminium housing dual-capacitor asynchronous motors, with the latest design in entirety, are made of selected quality materials and conform to IEC standards.

Single phase motors have good performance, safety and reliable operation; it has a multiple of starting torque up to 2.5. These series of motors are suitable for requirements with big starting torque and high over load, such as air compressors, pumps and many other small types of machinery.

Dual Speed Motors

Three-Phase Asynchronous Motors
Cast Iron / Aluminum Housing

Dual speed series of three phase asynchronous motors are constructed Totally Enclosed Fan Cooled (TEFC), and is available in both cast iron and aluminium housing. This series of motors has the capability of operation at multiple power output and/or multiple speeds with a wide selection of variation.

Dual Speed motors utilises very special winding technology to achieve its flexible capabilities, reliable operation and professional appearance, easy to maintain, while low on noise and little vibration. This series of motors is used widely for fan and pump industry.

Explosion Proof Motors

Three-Phase Asynchronous Motors Cast Iron Housing

Explosion proof motors are manufactured according to International IEC standards, and can be delivered with International ATEX Certificate for all frame sizes, and for many different ex-proof requirements. This series of motors are designed to conform to the standards of Exd IIA T4, Exd IIB T4, Exd IIC T4.

EXPLOSION

Nemko **Ex**  Page 1 of 3

[1] EC-TYPE EXAMINATION CERTIFICATE
[2] Equipment or Protected System Intended for use in Potentially explosive atmospheres
Directive 94/9/EC

[3] EC-Type Examination Certificate Number: Nemko 08ATEX1097

[4] Equipment or Protective System: Motor

[5] Applicant/ Manufacturer: Nanyang Explosion Protection Group Co., Ltd.
[6] Address: No.22 North Zhongjing Road
Nanyang, Henan,
P. R. CHINA

[7] This equipment or protective system and any acceptable variation thereto is specified in the schedule to this certificate and the documents therein referred to.

[8] Nemko AS, notified body number 0470 in accordance with Article 9 of Council Directive 94/9/EC of 23 March 1994, certifies that this equipment or protective system has been found to comply with the Essential Health and Safety requirements relating to the design and construction of equipment and protective systems intended for use in potentially explosive atmospheres given in Annex II to the Directive.

The examination and test results are recorded in confidential report no. 110359

[9] Compliance with the Essential Health and Safety Requirements has been assured by compliance with:
CENELEC EN 60079-0: 2004
CENELEC EN 60079-1: 2004
CENELEC EN 60079-7: 2003

[10] If the sign "X" is placed after the certificate number, it indicates that the equipment or protective system is subject to special conditions for safe use specified in the schedule to this certificate.

[11] This EC-TYPE EXAMINATION CERTIFICATE relates only to the design, examination and tests of the specified equipment or protective system in accordance to the directive 94/9/EC. Further requirements of the Directive apply to the manufacturing process and supply of this equipment or protective system. These are not covered by this certificate.

[12] The marking of the equipment or protective system shall include the following:

**Ex II 2 G Ex d IIB T4, or
Ex de IIB T4, or
Ex de IIC T4
Ta : +40°C (Can be extended to +60°C, see conditions page 2)**

Marine Motors

Three-Phase Asynchronous Motors Cast Iron Housing

Elektrim Techtop marine class motors are manufactured according to International IEC standards and can be delivered with GL (Germanischer Lloyd) Type Approval Certificate for all frame sizes, and suitable for third party witness certification testing from all major marine certification societies. Marine motors are installed in various industrial and marine fields all over the world, and are a reliable prime mover for all vessel and marine applications.

Type Approval Certificate		GL
This is to certify that the undemoted product(s) has/have been tested in accordance with the relevant requirements of the GL Type Approval System.		
Certificate No.	62 000 - 14 HH	
Company	Shanghai Top Motor Co., Ltd. No.303 Kangliu Road Kangqiao Town Pudong, Shanghai, 201315, CHINA	
Product Description	Induction Motors Cast iron frame	
Type	T1C...T2C...T3C... frame sizes 60 up to 355 TCL...TCP... frame sizes 60 up to 355	
Environmental Category	H	
Technical Data / Range of Application	Place of manufacturing: SHANGHAI HIMAK ELECTRICAL MA. CO., LTD. No. 568 YUANXI Rd, NANHUI Industry Area Pudong, Shanghai, P. R. China Sizes: 1, 2, 3, S, S1, S2, M, M1, M2, L, L1, L2 Rated voltage: 220 V up to 690 V Rated power, Duty Type: S1 0.75 kW up to 315 kW Synchronous speed: 750 1/min up to 3600 1/min Rated frequency: 50 Hz, 60 Hz Ambient temperature: 45 °C Thermal class: 155 (F) Degree of protection: IP 55, IP 56, IP 65 No. of poles: 2, 4, 6 and 8 Spec. model: For marine applications / environments Guidelines for the Performance of Type Approvals, Chapter 2- Test Requirements for Electrical / Electronic Equipment and Systems (V6-7-2), Edition 2012	
Test Standard
